European Cases of the Reincarnation Type Ian Stevenson, M.D., 2015-09-02 Many cultures accept that a person may die and then come back to life in another form but Westerners have traditionally rejected the idea Recently however surveys conducted in Europe indicate a substantial increase in the number of Europeans who believe in reincarnation and numerous claims of reincarnation have been reported This book examines particular cases in Europe that are suggestive of reincarnation The first section provides a brief history of the belief in reincarnation among Europeans The second section considers eight cases from the first third of the twentieth century that were not independently investigated but were reported and sometimes published by the persons concerned The third section covers 32 cases from the second half of the twentieth century that were investigated by the author Many of these cases involved either children who exhibited unusual behavior attributed to a previous life or adults who experienced recurrent or vivid dreams attributed to a previous life In the fourth section the author compares European cases suggestive of reincarnation with those of other countries and cultures

Irreducible Mind Edward F. Kelly, Emily Williams Kelly, 2007 Practically every contemporary mainstream scientist presumes that all aspects of mind are generated by brain activity We demonstrate the inadequacy of this picture by assembling evidence for a variety of empirical phenomena which it cannot explain We further show that an alternative picture developed by F W H Myers and William James successfully accommodates these phenomena ratifies the common sense view of ourselves as causally effective conscious agents and is fully compatible with contemporary physics and neuroscience

Stokes,2015-01-24 What makes us who we are From a scientific

viewpoint any individual's existence is improbable at best. Consciousness as an actuality is inarguable; its nature, however, remains elusive. This work argues the view of self as a field of pure consciousness, debating the existence of a continuing self and drawing conclusions about this entity and its relation to the physical body and the physical world. Beginning with an exploration of the relationship between mind and matter, it discusses ostensible psi phenomena such as extra sensory perception and psychokinesis and their implications for our understanding of the mind and the cosmos. Additional topics include the perennial mind/body problem, the role of consciousness in quantum mechanics, and conversely the role of quantum mechanics in the study of consciousness, the anthropic principle, and evidence for Intelligent Design. Quasi-religious questions such as the survival of consciousness after death are also addressed.

This comprehensive presentation examines scientific evidence of reincarnation case histories, near death experiences, heredity, genius, etc. It explores social and religious issues and includes lectures delivered at Harvard and Columbia. *Collected Writings: Rebirth as doctrine and experience : essays and case studies* Francis Story, 1975 Yogic Perception, Meditation and Altered States of Consciousness Eli Franco, Dagmar Eigner, 2009. The volume presents seventeen papers by different scholars that examine from an interdisciplinary perspective questions concerning meditation and yogic perception. The contributions focus on various aspects such as the nature of consciousness, the relation of body and mind, and health and bind together the perspectives and approaches of disciplines such as South Asian Buddhist and Tibetan studies, religious studies, philosophy, and the history of philosophy, medieval European history, anthropology, and psychology. In contrast to recent interdisciplinary studies on meditation that take the natural sciences as their focal point, notably quantum mechanics and neurophysiology, this volume uses methods established in the social sciences and humanities as tools for understanding meditative traditions, especially those found in Buddhism and Hinduism. **New Clothes for Old Souls** Guy Lyon Playfair, 2006 The Paranormal Review, 2004 The Journal of the American Society for Psychical Research American Society for Psychical Research, 1996.
