## **Europe's Border Crisis Biopolitical Security And Beyond:**

**Europe's Border Crisis** Nick Vaughan-Williams, 2015 The European Union EU Commission champions a migrant centred approach to border security and irregular migration management it claims not only to observe human rights but also to use surveillance to enhance the humanitarian protection of endangered lives on land and at sea Yet research presented by Non Governmental Organizations and irregular migrants own testimonies reveal systemic border violence dehumanization in spaces of detention and exposure to death via abandonment in hostile environments This book turns to conceptual resources found in biopolitical theory in order to move diagnoses of Europe's border crisis beyond that of a gap between the policy rhetoric of humanitarianism and the reality of irregular migrants embodied experiences It argues that both positive and negative dimensions of EU border security are symptomatic of tensions within biopolitical techniques of government and what Roberto Esposito refers to as the paradigm of immunization While bordering practices are designed to play a defensive role they contain the potential for excessive and often lethal security mechanisms that end up threatening the very values and lives they purport to protect Each chapter draws on a different biopolitical key to identify and interrogate diverse technologies of power at a range of border sites Must border security always result in dehumanization and death Are humanitarian discourses sufficient for critiquing contemporary forms of border violence Is a more affirmative approach to border politics possible Europe's border crisis addresses these pressing questions and advances new research agendas for critical border and migration studies beyond existing debates about control versus escape **Patterns in Border Security**

Christian Leuprecht, Todd Hataley, Emmanuel Brunet-Jailly, 2022-12-12 How do security communities transform into security regimes This book compares the construction of cross border security regimes across five regions of the world to illustrate how trust emerges from the day to day relations of coordination cooperation or collaboration Patterns in Border Security Regional Comparisons studies the way borderland communities develop implement and align border policy to enhance their sense of security Borders have been evolving rapidly in direct response to the multifaceted challenges brought on by globalization which has had a nuanced impact on the way borders are governed and border security is managed Taking a methodical comparative regional approach this book identifies and contrasts determinants of nascent ascendant and mature border security regimes which the book documents in seven regional case studies from across the globe The findings identify conditions that give rise to cross border and trans governmental coordination cooperation or collaboration Specifically pluralistic forms of communication and interactions sometimes far from the actual borderline emerge as key determinants of friendly and trustful relations among both contiguous and non contiguous regions This is a significant innovation in the study of borders in particular in the way borders mediate security For six decades international security studies had posited culture as the bedrock of security communities By contrast the book identifies conditions a method and a model for adequate and effective cross border relations but whose outcome is not contingent on culture The chapters in this book were originally

published as a special issue of Commonwealth and Comparative Politics with a Foreword by the Secretary General of the World Customs Organization The Open Access chapters of this book available at <http://www.tandfebooks.com/doi/view/10.4324/9781003216926> have been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
