Research Methods in Psychology Morling, Beth, 2017-12-01 Drawing on examples from popular media and journals author Beth Morling inspires a love of her subject by emphasizing its relevance Yes students learn how to design research studies but they also see the value of evaluating research claims they encounter in daily life The Third Edition builds on this successful foundation by providing new ways for students to practice what they learn NEW Working It Through examples provide a step by step method for evaluating claims start to finish and a NEW adaptive learning tool InQuizitive enables students to practice what they ve learned and strengthen their comprehension *Evaluating Research Methods in Psychology* George Dunbar, 2008-04-15 Using a series of over 40 case studies this valuable text illustrates the processes and pitfalls involved in evaluating psychological research Invites students to consider whether the conclusion drawn at the end of each case is correct or whether the results could have an alternative explanation Cross referencing between sections is made easy by page references that link the case studies and explanations Cases reflect the range of research methods taught at undergraduate level and include qualitative research Gives students an understanding of methodological problems Equips students to critically evaluate published research The author and publishers have made every effort to be fair to the authors of the research described in this book Like all sciences psychology is forged in the fire of criticism and refinement and we hope that the original researchers will understand that any criticism is made with the utmost respect If you are an author of one of the pieces of research mentioned in the book and would like to respond to the critique presented please e mail your comments to Andrew McAleer at Andrew McAleer oxon blackwellpublishing com *Research Methods in Psychology* Gary W. Heiman, 1995 Research Methods focuses on decisions and conclusions rather than rules and procedures to help students develop the critical thinking skills necessary for understanding and designing research The text emphasizes the need to evaluate a design s strengths and weaknesses when selecting a method and interpreting results The Second Edition includes a full chapter on ethics and places the statistics review after the introduction of basic design issues to focus on statistics as a set of tools for analyzing research results A unique capstone chapter Designing and Evaluating Research walks students through four research studies summarizes content and suggests additional topics for research **Research Methods in Psychology** Beth Morling, 2020 Featuring an emphasis on future consumers of psychological research and examples drawn from popular media Research Methods Evaluating Psychology in the Real World 4e develops students critical thinking skills as they evaluate information in their everyday lives The Fourth Edition of this dominant text takes learning to a new level for both consumers and producers by offering new content interactive learning and online assessment to help them master the concepts Most chapters will be familiar to veteran instructors including chapters on measurement experimentation and factorial designs However unlike some methods books this one devotes two full chapters to correlational research one on bivariate and one on multivariate studies which help students learn how to interpret apply and interrogate different types of

association claims one of the common types of claims they will encounter There are three supplementary chapters on descriptive statistics inferential statistics and scientific writing APA Style reports and posters These chapters provide a review for students who have already had statistics and provide the tools they need to create research reports and conference posters The appendices provide statistical tables for students who are conducting their own research

Evaluating Research Francis C. Dane,2009-12-29 Aids students in understanding and interpreting quantitative research articles Designed for anyone who needs to learn to read and understand empirical reports in the social and behavioral sciences this multidisciplinary book provides individuals with the knowledge necessary to understand research without overwhelming them with information about how to conduct research His enthusiasm for methods present on every page author Francis C Dane wants readers to have the skills to evaluate research and critically use empirical results Readers will gain a greater appreciation for the ways in which consuming research can add to their understanding of the way the world works and how they can enhance their efforts to improve it Key Features Every facet of evaluating research is covered from key terms and concepts to communicating the final results The author pairs statistical concepts and procedures with appropriate research methods Strong pedagogy such as chapter overviews summaries key terms and application exercises allows readers to check their understanding of the material This book can be used in both upper level undergraduate and graduate level courses in public policy public health education sociology psychology social work and nursing **Research Methods in Psychology: Evaluating a World of Information, 3e with Media Access Registration Card + SPSS for Research Methods: A Basic Guide** Beth Morling,Georjeanna Wilson-Doenges,2017-12-05 **Research Methods in Psychology: Evaluating a World of Information (Fourth International Student Edition)** Beth Morling,2020

Dane, Elliot Carhart,2022-02-08 Evaluating Research 3e provides students with the skills to read and evaluate research studies Aimed at courses where it will be more important for students to read than conduct research this book covers all aspects social behavioral and health science research from the ground up as well as main types of research methods **Research Methods in Psychology** David G. Elmes, Barry H. Kantowitz, Henry L. Roediger,1992

*Research Methods in Psychology* R. A. McQueen, Christina Knussen,1999 This text follows the basic structure underlying any research project starting with decisions about topic choice and progressing the competent handling of complex data to using the SPSS statistical package The emphasis is on understanding the concepts of any analysis undertaken rather than knowing precisely how to do correct mathematical calculations Features include quotations from students reflecting their fears and concerns illustrative boxes showing relevant examples and a flowchart and navigation guide to individual chapter contents allowing students to access material easily at any point in the text **Evaluating Research** Francis C. Dane,2011 The book is intended to help students understand and interpret research articles and how to evaluate what was done in the research It is not intended to show them how to do research but rather how to understand research articles and evaluate that

research     Research Methods for Psychological Science William J. Ray, 2021-07-21 Presents key topics with an emphasis on experimental research and logic Students will learn the importance of developing testable hypotheses how to evaluate new information critically and the impact of research on ourselves and our society     Research Methods in Applied Settings Jeffrey A. Gliner, George A. Morgan, Nancy L. Leech, 2011-03-17 Through its integrated approach to quantitative research methods this text teaches readers how to plan conduct and write a research project and select and interpret data so they can become better consumers of research This is not a statistics book there are very few formulas Rather this book helps students master which statistic to use when and how to interpret the results Organized around the steps one takes in conducting a research project this book is ideal for applied programs and for those who want to analyze and evaluate research articles Having taught in a variety of departments the authors have a good grasp of the research problems faced by master s and doctoral students in diverse areas of the behavioral and social sciences Text adopters applaud the book s clarity Students are often confused by other texts use of inconsistent terminology To avoid this confusion the authors present a semantically consistent picture that emphasizes five research approaches randomized experimental quasi experimental comparative associational and descriptive The authors then show how these approaches lead to three kinds of research designs which in turn lead to three groups of statistics with the same names This consistent framework increases comprehension and the ability to apply the material Numerous applied problems annotated examples and diagrams and tables further promote comprehension Although the book emphasizes quantitative research the value of qualitative research is introduced This extensively revised edition features more than 50% new material including A new chapter on the evidence based approach that emphasizes the importance of reporting confidence intervals and effect sizes and the increased use of meta analysis An increased emphasis on evaluating research including an 8 step plan for evaluating research validity Chs 23 24 and its application to the 5 sample studies used throughout the book Ch 25 Lots of practical advice on planning a research project Ch 2 data collection and coding Ch 15 writing the research report Ch 27 questions to use in evaluating a research article Appendix E and creating APA tables and figures Appendix F A new chapter on non experimental approaches designs Ch 7 including qualitative research Web resources for students including critical thinking problems with answers and a sample outline of a research proposal An earlier and expanded introduction to measurement reliability and validity to further emphasize their differences and importance An extensively revised chapter on measurement validity consistent with the latest APA AERA NCME standards Fewer chapters on inferential statistics with an increased focus on how their selection is related to the design of the study and how to interpret the results using significance testing and effect sizes and confidence intervals Instructor s Resources with Power Points test questions answers to the application questions and more Intended for graduate research or quantitative experimental methods design courses in psychology education human development and family studies and other behavioral social business and health sciences independent sections and chapters can be read in
