Evaluation In Media Discourse Analysis Of A Newspaper Corpus Monika Bednarek:

Evaluation in Media Discourse Monika Bednarek, 2006-12-26 Evaluation is the linguistic expression of speaker writer opinion and has only recently become the focus of linguistic analysis This book presents the first corpus based account of evaluation one hundred newspaper articles collated to form a 70 000 word comparable corpus drawn from both tabloid and broadsheet media The book provides detailed explanations and justifications of the underlying framework of evaluation as well as demonstrating how this is part of the larger framework of media discourse Unlike many other linguistic analyses of media language it makes frequent reference to the production circumstances of newspaper discourse in particular the so called news values that shape the creation of the news Cutting edge and insightful Evaluation in Media Discourse will be of interest to academics and researchers in corpus linguistics and media discourse *Working with Spanish Corpora* Giovanni Parodi, 2007-09-01 The main focus of this book is the investigation of linguistic variation in Spanish considering spoken and written specialised and non specialised registers from a corpus linguistics approach and employing computational updated tools The ten chapters represent a range of research on Spanish using a number of different corpora drawn from amongst others research articles student writing formal conversation and technical reports A variety of methodologies are brought to bear upon these corpora including multi dimensional and multi register analysis latent semantics and lexical bundles This in depth analysis of using Spanish corpora will be of interest to researchers in corpus linguistics or Spanish language **News Discourse** Monika Bednarek, Helen Caple, 2018-10-19 Now reissued and retypeset this canonical book explores the role of language and images in newspaper radio online and television news The authors introduce useful frameworks for analysing language image and the interaction between the two and illustrate these with authentic news stories from around the English speaking world ranging from the Oktoberfest to environmental disasters to the killing of Osama bin Laden This analysis persuasively illustrates how events are retold in the news and made newsworthy through both language and image This clearly written and accessible introduction to news discourse is essential reading for students lecturers and researchers in linguistics media and journalism studies and semiotics *Keywords in the Press: The New Labour Years* Lesley Jeffries, Brian Walker, 2017-11-16 Building on Raymond Williams iconic *Keywords* released in 1975 Jeffries and Walker show how some pivotal words significantly increased in use and evolved in meaning during the years of the New Labour project Focussing on print news media this book establishes a set of socio political keywords for the Blair Years and demonstrates how their evolving meanings are indicative of the ideological landscape in Britain at that time and the extent to which the cultural hegemony of the New Labour project influenced the language of the commentariat Combining corpus linguistic approaches with critical stylistics the authors conduct an analysis of two newspaper corpora using computational tools Looking closely at textually constructed meanings within the data their investigation of the keywords has a qualitative focus and sets out a clear methodology for combining corpus approaches with systematic co textual analysis Language and

Social Cognition Hanna Pishwa, 2009-07-14 In a collection of 16 papers eminent scholars from several disciplines present diverse and yet cohering perspectives on the expression of social knowledge its acquisition and management Hence the volume is an attempt to view the social functions of language in a novel systematic way Such an approach has been missing due to the complexity of the matter and the emphasis on purely cognitive properties of language The volume starts with a presentation of overarching issues of the social nature of humans and their language providing strong evidence for the social fundamentals of human nature and their reflection in language and culture The second section demonstrates how social functions can be displayed in discourse by using language play and humor irony and attributions as well as references to social schemas The chapters in the third part examine a wide range of particular linguistic elements carrying social cognitive functions An important finding is that social cognitive functions have to be inferred on the basis of social knowledge frequently with the help of non verbal cues since languages offer only few direct expressions for them In other words linguistic devices used to express social content tend to be multifunctional Interestingly this multifunctionality does not prevent their rapid recognition The volume presents valuable information to linguists by widening the cognitive linguistic framework and by contributing to a better understanding of the role of pragmatics It is also beneficial to social and cognitive psychologists by offering a broader view on the encoding and decoding of social aspects Finally it offers a number of fruitful ideas to students of cultural and communication studies

Foundations of Pragmatics Wolfram Bublitz, Neal R. Norrick, 2011 Opening the 9 volume series Handbooks of Pragmatics this handbook provides a comprehensive overview of the foundations of pragmatics It covers the central theories as well as concepts and topics characteristic of mainstream pragmatics i e the most widespread approach to the ways and means of using language in authentic social contexts The articles provide both state of the art reviews and critical evaluations of research in pragmatics Topics are thus not only considered within their scholarly context but are also critically evaluated from current perspectives

Conversation in Context Christoph Rühlemann, 2007-12-24 *Conversation in Context* examines real life speech data from the British National Corpus to show how language is used in natural conversation The monograph describes the composition annotation and transcription of the corpus as well as providing a discussion of the methodology used in corpus analysis The book uses a situational framework for conversation and argues that conversation is adapted to constraints set by the situation and to speaker needs arising from these constraints Such a contextual view reveals a greater complexity to conversation construction than could have been anticipated without the use of corpus based methods This book will be of interest to academics researching corpus linguistics discourse analysis and sociolinguistics

Lund Studies in English, 1933

Political Discourse, Media and Translation Christina Schäffner, Susan Bassnett, 2010 This volume addresses the role played by translation in international political communication and news reporting and brings to light the usually invisible link between politics media and translation The contributors explore the interrelationship between media in the widest sense and

translation with a focus on political texts institutional contexts and translation policies These topics are explored from a Translation Studies perspective thus bringing a new disciplinary view to the investigation of political discourse and the language of the media The first part of the volume focuses on textual analysis investigating transformations that occur in translation processes and the second part examines institutional contexts and policies and their effects on translation production and reception

Idioms and Collocations Christiane Fellbaum, 2007-05-08 Demonstrates how corpus based research can advance the understanding of linguistic phenomena in a given language *Emotion Talk Across Corpora* Monika Bednarek, 2008-06-17 Emotion Talk Across Corpora offers new insights into how English speakers talk about their own and others emotions It is the first book length treatment of emotion talk in four registers of British English conversation news reportage fiction and academic discourse to combine research in two well known linguistic approaches Appraisal Theory and Corpus Linguistics Using a 20 million word corpus of British English a subset from the British National Corpus it combines small and large scale corpus studies of emotion terms and their patterns with an analysis of texts according to a modified version of Appraisal theory The book is a major contribution to the study of language and emotion drawing on findings from cognitive linguistics psychology and linguistic appraisal theory to model and interpret emotion talk and will appeal to all researchers interested in the use of emotion talk in naturally occurring discourse
