Evaluative Morphology From A Cross Linguistic Perspective:

Evaluative Morphology from a Cross-Linguistic Perspective Lívia Körtvélyessy, 2015-01-12 This book presents the results of the first interdisciplinary approach to evaluative morphology based on the intersection of evaluative morphology and areal typology and provides the first large scale typological research based on a sample of 200 languages Furthermore it also represents the first work dealing with evaluative morphology as a feature of Standard Average European by comparing the SAE and world samples Methodologically it introduces the parameter of Evaluative Morphology Saturation which identifies the richness of evaluative morphology in individual languages by reflecting the semantic word class and word formation aspects of evaluative morphology As such this book provides a new and innovative approach to studying the semantics of evaluative morphology and evaluative formation represented by two cognitively founded models a radial model of EM semantics and a model of evaluative formation It is also the first contrastive psycholinguistic work that studies phonetic iconicity in evaluative morphology by way of experimental research into five different age groups of informants speaking three different languages

Edinburgh Handbook of Evaluative Morphology Nicola Grandi, 2015-06-03 With examples drawn from over 200 world languages this ground breaking volume presents a state of the art overview of evaluative morphology

A Crosslinguistic Perspective on Clear and Approximate Categorization Hélène Vassiliadou, Marie Lammert, 2022-11-07 In recent decades research on clear and approximate categorizations and their manifestations in language has been generating a number of studies on syntax semantics pragmatics psycholinguistics philosophy and logic This is particularly interesting because these two operations have formally similar realizations even in languages belonging to different groups The existence of a large number of type nouns testifies to their productivity If these nouns serve to both categorize and approximate the fundamental question is that of identifying the processes of interpretation concerned since there is not always a consensus on interpretation This book makes it clear that there are different ways to reach the category associated with a word by putting into perspective the issues surrounding the categorization and approximation and by comparing the ways of expression in languages belonging to different language groups All in all by investigating syntactic morphological and semantic correlations between type noun binominals and other constructions in various languages this volume will provide an overview of the current state of research on the subject in order to help scholars and students to grasp the meaning and the cognitive foundations of approximation and categorization The functioning of each language might clarify the links between categorization and approximation two often opposed yet essentially indissociable operations

Complex Words Lívia Körtvélyessy, Pavol Štekauer, 2020-10-08 Drawing on innovative research the book reveals the wealth and breadth of the study of word formation both theoretically and empirically

Wichi and Yurakare **Diminutives across Languages, Theoretical Frameworks and Linguistic Domains** Stela Manova, Laura Grestenberger, Katharina Korecky-Kröll, 2023-12-18 This volume addresses a number of issues in current morphological theory from the point of view of diminutive formation such as the role of phonology in diminutives and hypocoristics and consequently its place in the overall architecture of grammar i.e. phonology first versus syntax morphology first theoretical analyses diminutives in the L1 acquisition of typologically diverse languages and the borrowing of non diminutive morphology for the expression of diminutive meanings among others Among the peculiarities of diminutive morphology discussed are the relation between diminutives and mass nouns the avoidance of diminutives in plural contexts in some languages and the relatively frequent semantic bleaching and reanalysis of diminutive forms cross linguistically Special attention is paid to the debate on the head versus modifier status of diminutive affixes corresponding to high versus low diminutives in alternative analyses with data from spoken and sign languages Overall the volume addresses a number of topics that will be of interest to scholars of almost all linguistic subfields and persuasions Word-Formation - Semantics and Pragmatics Peter O. Müller, Susan Olsen, Franz Rainer, 2025-08-04 This reader is part of a five volume edition and comprises an in depth presentation of the state of the art in word formation Volume 3 places its emphasis on the semantic models and pragmatic features of complex words *Competition in Inflection and Word-Formation* Franz Rainer, Francesco Gardani, Wolfgang U. Dressler, Hans Christian Luschützky, 2019-09-17 This is the first volume specifically dedicated to competition in inflection and word formation a topic that has increasingly attracted attention Semantic categories such as concepts classes and feature bundles can be expressed by more than one form or formal pattern This departure from the ideal principle one form one meaning is particularly frequent in morphology where it has been treated under diverse headings such as blocking Elsewhere Condition P ini s Principle rivalry synonymy doublets overabundance suppletion and other terms Since these research traditions despite the heterogeneous terminology essentially refer to the same underlying problems this volume unites the phenomena studied in this field of linguistic morphology under the more general heading of competition The volume features an extensive state of the art report on the subject and 11 research papers which represent various theoretical approaches to morphology and address a wide range of aspects of competition including morphophonology lexicology diachrony language contact psycholinguistics sociolinguistics and language acquisition

Word-Formation Peter O. Müller, Ingeborg Ohnheiser, Susan Olsen, Franz Rainer, 2015-07-01 This handbook comprises an in depth presentation of the state of the art in word formation The five volumes contain 207 articles written by leading international scholars The XVI chapters of the handbook provide the reader in both general articles and individual studies with a wide variety of perspectives word formation as a linguistic discipline history of science theoretical concepts units and processes in word formation rules and restrictions semantics and pragmatics foreign word formation language planning and purism historical word formation word formation in language acquisition and aphasia word formation and language use tools

in word formation research The final chapter comprises 74 portraits of word formation in the individual languages of Europe and offers an innovative perspective These portraits afford the first overview of this kind and will prove useful for future typological research This handbook will provide an essential reference for both advanced students and researchers in word formation and related fields within linguistics Journal of Linguistics ,2014 **Linguistics and Language Behavior Abstracts** ,2008 The Acquisition of Derivational Morphology Veronika Mattes,Sabine Sommer-Lolei,Katharina Korecky-Kröll,Wolfgang U. Dressler,2021-11-15 This book offers the first systematic study of the early phases in the acquisition of derivational morphology from a cross linguistic and typological perspective It presents ten empirical longitudinal studies in genealogically and typologically diverse languages Indo European Finno Ugric Altaic with different degrees of derivational complexity Data collection analysis and systematic comparison between child speech and parental child directed speech are strictly parallel across the chapters In order to identify the productivity of a derivational pattern signalling the crucial developmental stage in its acquisition the concept of the mini paradigm criterion was applied Similar developmental processes can be observed in all children independent of the language they acquire but the children s courses of development also show obvious typological differences This points towards an important impact of the structural properties of the specific language on emergence use and the early course of development of derivational patterns

Evaluative Constructions in Italian Sign Language (LIS) Elena Fornasiero,2023-09-18 The domain of evaluative morphology is vast and complex as it requires the combination of morphological semantic and pragmatic information to be understood Nevertheless cross linguistic studies on spoken languages show that languages share some patterns in the way they encode evaluative features It follows that investigating evaluative morphology in sign languages SLs can enrich the literature and offer new insights This book provides descriptive and theoretical contributions by considering Italian Sign Language LIS as empirical ground of investigation At the descriptive level the analysis of corpus and elicited data improves the description of morphological processes in LIS as well as typological studies on evaluative morphology by adding the patterns of a visuo gestural language At the theoretical level the study shows the benefit of combining different approaches Generative Linguistics Linguistic Typology Cognitive Linguistics for the exploration of evaluative constructions in SLs as it allows to identify both modality specific and modality independent properties In sum this book encourages the readers to rely on different data types analyses and theoretical perspectives to investigate linguistic phenomena in SLs **Acta Societatis Linguisticae Europaeae** ,2008 **Lingua e stile** ,1998 Cognitive Perspectives on Language Barbara Lewandowska-Tomaszczyk,1999 The papers collected in the present volume show that the terms cognitivism and cognitive so common in present day linguistic discourse do not refer to a single theoretical mode or approach to language Firstly the papers show that cognitivism is a lively research area accommodating a wide spectrum of approaches Secondly they address a number of issues ranging from grammaticalization event structure semantic representation equivalence image schematic

representations and lexicography to poetry metaphor metonymy and national mentality Some of the contributions deal with the linguistic phenomena in one language while others take up a cross linguistic approach *MLA International Bibliography of Books and Articles on the Modern Languages and Literatures* Modern Language Association of America,2008
