Evaluating Textbooks and Their Potential for EFL Learning and Teaching. A Case Study Saleem Arif,2020-04-27 Master s Thesis from the year 2020 in the subject Didactics for the subject English Miscellaneous grade 1 0 University of Duisburg Essen Department of Anglophone Studies language English abstract In contrast to the reality outside of school textbooks especially in the context of teaching English as a foreign language TEFL are still the most important medium for language learning purposes today However the academic evaluation of textbooks is surprisingly a rather neglected field of study Also the very

few studies that evaluate an EFL textbook mostly only consider the technical dimension of analysis such as the theoretical perspective of EFL methodology. Yet to gain a more holistic impression of a textbook one should also include the practical perspective of EFL teachers. Therefore the present case study critically evaluates one exemplary textbook combining the theoretical perspective of EFL didactics and the practical perspective of EFL teachers. The TEFL textbook chosen for this case study is titled *English G21 A5* published by Cornelsen in 2010. It is designed for grade 9 at Gymnasium in Germany. Taking Unit 1 of this textbook as an example, this paper aims at examining the potential of this textbook for EFL learning and teaching. The central question is whether the textbook meets the various requirements posed to a textbook including the numerous principles that are part of contemporary EFL methodology and central educational standards. In the first part of the analysis (chapter 4) the question is in how far the textbook meets the theoretical requirements of TEFL. For the second part of the analysis (chapter 5) a small survey was carried out conducting qualitative interviews with four different teachers. Employing qualitative content analysis the survey intends to find out about the teachers' opinion on the textbook focusing on the question how the teachers assess the value of the textbook for their teaching practice. Prior to the analysis it is however necessary to elaborate on some theoretical background (chapter 2). This involves describing the main paradigms of contemporary EFL methodology as well as illustrating relevant theoretical context in relation to the term textbook and textbook evaluation revealing central requirements EFL textbooks need to fulfil. The aim of this twofold description is to develop a list of criteria (section 2.2.4) that will be used as the foundation of the textbook evaluation. The selected textbook will be introduced in more detail in chapter 3.

Evaluation in Foreign Language Education in the Middle East and North Africa Sahbi Hidri, Christine Coombe, 2016-09-27. This book presents evaluation cases from the Middle East and North Africa (MENA) context investigating the various facets of evaluation in different parts of the MENA region and beyond. In 19 chapters it explores cases from Tunisia, Saudi Arabia, Egypt, Sudan, Syria, the UAE, Turkey, Iran, and Morocco. The book highlights the impact of evaluation on a range of stakeholders, arguing that it has repercussions at the individual, societal, economic, cultural, and political levels; that it also has an ethical dimension; and that it is tailored to people's needs, helping them to remain abreast of the effectiveness and efficiency of programs. Further, the book explores controversial issues concerning different evaluation themes such as teacher and staff evaluation, assessment practices, text genre analysis, evaluation of productive skills, textbook and ICT evaluation, evaluation of ELT certificates and programs, quality assurance, ESP needs analysis, assessment of literacy and dynamic assessment. It addresses key challenges such as who the right people to implement evaluation are and the appropriate use of evaluation results to avoid any misuse or harm to any stakeholder. In closing, the book calls for further research venues on the relevance of evaluation, testing, and assessment in the

Expertise in EFL Textbook Evaluation Mija Kim, 2010 This thesis reports on a study of expertise in English as a foreign language EFL textbook evaluation So far studies in the area of EFL textbook evaluation have focused on what evaluators should do rather than what they actually do However this thesis describes the procedures used in practice by a group of teacher evaluators in terms of what they focused on and their manner of doing so in their actual evaluation of an EFL textbook The study was conducted in the Korean high school setting where school teachers are required to choose from among the authorised EFL textbooks approved by the Ministry of Education The primary heuristic involved in the study was the concept of expertise The attempt was therefore made to distinguish between the textbook evaluation approach of the research subjects who were conceptualised as on the one hand expert evaluators and on the other those thought of as non experts Thus twelve Korean EFL school teachers were chosen to evaluate one of the authorised EFL textbooks and data gathered concerning their evaluations by means of concurrent verbalisation i.e. the research subjects were audio taped while providing think aloud accounts of their evaluation procedures A judgment group comprising a panel of personnel with distinguished records in the areas of textbook evaluation and production in the Korean context then examined the data from the evaluations and made judgements on their quality in terms of whether they were considered expert non expert or in between the two The transcripts of the evaluation session tapes were coded using a grounded approach in order to distinguish the features attaching to each of the three main categories of evaluators The analysis indicated that the expert evaluators evaluated at a much deeper level than the non experts as evinced by what they considered what their priorities were and the nature of the cognitive activities they used The study is seen to have pedagogic implications for both textbook development and teacher development as well as for the development of a research framework that bridges a current gap in textbook evaluation studies It is also seen as contributing to widening the potential for the application of an expertise perspective within applied linguistics in general

Developing and Validating an Analytic Rating Scale for Large-Scale EFL Writing Assessment Shaoyan Zou, 2025-10-21 The debate between holistic and analytical scoring methods in second language assessment has long persisted This book addresses the effectiveness and validity of the holistic rating scale used in China's high stakes CET 4 College English Test Band 4 writing tests via systematic case study analysis Using a multi phase mixed methods research methodology the author creates and validates a new analytical rating scale that redefines and operationalizes critical aspects of writing assessment Through extensive empirical evidence including rater cognition studies expert reviews and Rasch based descriptor calibration the author reveals the limitations of holistic scoring systems and demonstrates the necessity and validity of analytical methods The author convincingly argues that this new scoring method translates to a more transparent fair and diagnostic model for large scale EFL writing assessment This book is an essential

reference for researchers in applied linguistics language assessment and English language education It also offers valuable insights for assessment specialists test developers and language policymakers seeking more effective evaluation frameworks

EFL Curriculum Evaluation Ami Alani, 2014-06-06 Text book evaluation has been an emerging field of study in Applied Linguistics and Curriculum Studies in the recent years The authors of the present book subscribe to the idea that text book evaluation studies can accrue geometrically multiplied benefits to L2 pedagogy as a scientific and pragmatic oriented field of inquiry for a multitude of reasons Therefore the book is highly recommended for language teachers EFL learners curriculum designers second language learning researchers and applied linguists who aspire to advance the efficiency of linguistic pedagogy in EFL contexts
