Rubber Australia,1949 Textile Reinforcement of Elastomers W. C. Wake,David B. Wootton,1982-03 The technical importance of flexible composite structures needs no emphasis nor has there been any lack of material descriptive of their manufacture or properties The starting points of such descriptions have invariably been from the viewpoint of the rubber industry and the presence of a suitable textile has been taken for granted its strength properties indicated and the technological content confined to the manufacturing process within the rubber industry An attempt is made here to work from the textile outwards Industrial fabrics are far heavier than garment textiles are not produced in the same bulk quantities and need to be specially constructed to provide the balance of properties which will combine with those of the rubber to give the final product The most important composite structure formed from textiles and rubber is of course the pneumatic tyre It may therefore seem strange that no chapter deals with this The reason is quite simple To deal with the structure and design of the pneumatic tyre in a similar depth of detail as is done here for conveyor or power transmission belting or hose would require disproportionate space in fact a second volume equal in size to the present one This book discusses from the textile viewpoint the various reinforced rubber structures used industrially with the exception of the tyre These other uses of industrial fabrics can be discussed in adequate detail and cover the whole range of the technology involved in the space available in the one volume **Industrial Minerals** ,1985 **CME** ,1984 **Skillings' Mining Review** ,2002-07 Chartered Mechanical Engineer ,1984 Power Transmission Design ,1979 **International Coal Engineering Conference, 1990** ,1990 Mergent International Manual ,2003 *The Manufacturers Manual and Buyers Guide* ,1958 The Foundry Trade Journal ,1984 **Mine and Quarry** ,1983 **International Chemical Engineering and Processing Industries** ,1968 *The Engineer* ,1956 **Mechanical Handling International** ,1975
